Press release

Ref: distribution of Wills Wing hanggliders in Germany, France, Belgium and the Netherlands

The new Wills Wing partners

Since November 2007, Seagull Aviation in The Netherlands has been responsible for the distribution of Wills Wing hang-gliders, which are made in the USA. All of the latest models will be available. Due to the DHV certifications for Germany, most models will be available in Germany in spring 2008. This new distributorship will meet the requirements of many hang-gliding pilots in Central Europe.

Wills Wing:

Wills Wing world wide is one of the eldest and most well known manufacturers of hang-gliders. Both in the USA as well as in many other countries, Wills Wing is the best sold brand of hang-gliders ever.

Steven Pearson has been responsible for the technical development of the whole Wills Wing product range for more than 30 years. With his background in aircraft engineering, together with a great team, they have achieved a maximum level of knowledge in innovative development of hang-gliders. Furthermore, Wills Wing are the only hang-gliding manufacturer with a track record of more than 30 years!

Steve-Ton-Linda-Mike-Diederik-Rob

Seagull Aviation:

Seagull Aviation is an internationally operating organisation with a sales office in Raamsdonksveer in the Netherlands, close to Rotterdam.

A technical department and warehouse are close to Eindhoven Airport.

Seagull Aviation has several test sites available in the Eifel region in Germany. Both owners of Seagull Aviation have over 25 years of experience in hang-gliding; one as an instructor, the other in international sales and distribution.

DHV:

DHV is as a leading German organisation responsible for the certification of hang-gliders and paragliders. Together with DHV we expect to have most of the gliders certified by Spring 2008.

Trade shows:

A leading international trade show is the Free Flight Messe in Garmisch-Partenkirchen, from 14 to 17 March 2008. Steven Pearson of Wills Wing will attend as a special guest , together with the German dealers and Seagull Aviation.

Furthermore, there will be a one day trade show in the Netherlands early next year on the 27th of January in the Olympic sportshal in the centre of Wageningen.

Conclusion:

Many experienced hang-gliding pilots have been looking forward to the return of Wills Wing hang-gliders on the European market. The main reason? Wills Wings are one of the 3 best manufacturers of hang-gliders world-wide.

And the next good reason is the exchange rate between our EURO and the US dollars, which results in prices which are greatly reduced from those of 5 years ago.

Wills Wing: you cannot beat them. At All !

Many Happy Landings,

the Seagull Aviation Team
